

Safety and Health Policy

Based on the philosophy that safety is a barometer representing a company's ability, DENZAI tries to improve the management of working conditions, eradicate disasters and accidents, and work toward building trust from society and continuous business development.

- 1 Properly operate safety and health management system.**
- 2 Activate safety and health committee to promote disaster prevention.**
- 3 Promote internal education with guidance and management of working condition.**
- 4 Activate mental and physical health promotion to create a comfortable working environment.**
