DENZAI Completes Heavy Lifting Work on Daewoo E&C Nigeria's Indorama 3 Project

DENZAI (President and CEO: Kohki Uemura), a global leader in heavy lifting, transportation, and construction services, today announced that its group company, DENZAI International Projects, Co., Ltd., completed heavy lifting work on the Indorama 3 fertilizer production plant project in Port Harcourt, Nigeria, DENZAI's first project in Africa.

DENZAI International Projects provided technical planning, dispatched crane operators and leased a 1350t crawler crane, the LR11350, which was used for plant construction on behalf of our client, Daewoo E&C Nigeria Limited, a subsidiary of Daewoo Engineering & Construction. The project was awarded by Indorama Eleme Fertilizer & Chemicals Limited (IEFCL).

During the 3-month contract period, DENZAI performed a total of 19 heavy lifting operations — 7 in the Ammonia Area and 12 in the Urea Area — with a combined total weight of 4,350 tons.

The Indorama Fertilizer Line 3 will contain a 2,300 Metric Tons Per Day (MTPD) capacity for ammonia, a 4,000 MTPD urea facility. The project will support fertilizer consumption and promotes the successful use of arable land which should increase crop yields and food security in Nigeria.

Comment from Kohki Uemura, President & CEO, DENZAI K.K.

"We are pleased that we have successfully completed this project, the first of its kind in Africa. We sincerely hope that the construction of this fertilizer plant will contribute to improving the efficiency of agricultural production in Nigeria, and help alleviate the food crisis in Africa."

Comment from Jeong Won Seo, Director, DENZAI International Projects Co. Ltd.

"Completing DENZAI's first project in Africa without any accidents or injuries was a huge test for our company. This project was made possible by bringing together the efforts of employees from group companies in Korea, Japan, and other countries, and it has laid the foundation for our business in the rapidly growing African market."

About DENZAI

DENZAI is a global leader in providing engineered heavy lifting and specialized heavy transport services through expert solutions and innovative strategies. Backed by a fleet of state-of-the-art cranes and equipment, and a team of highly skilled engineers, operators, and specialists, DENZAI delivers a one-stop solution for complex logistical challenges. Founded in 1972 in Muroran, Hokkaido, Japan, DENZAI has more than 1,200 employees, headquarters in Japan and Singapore, and offices in Bangladesh, India, the Philippines, Saudi Arabia, South Korea, Thailand, UAE, Ukraine, USA and Vietnam. With more than 50 years of experience, we continue to meet our clients' evolving needs, including actively leading the development of renewable energy with our expertise in the installation, operation and maintenance of onshore and offshore wind turbines.
