

THP/SL FAMILY

HEAVY-DUTY MODULES (TOWED)

THP/SL-FAMILY HEAVY-DUTY HAULAGE HAS A NAME

Our THP/SL family is the ideal solution for transport companies of all sizes. With their limitless combination capability, extensive modular accessory system and expandability, SL-modules impress with unbeatable flexibility even for the heaviest loads.

THP/SL-S

LA LIGHTWEIGHT FOR THE HEAVIEST LOADS

The low dead weight and the lowloader variants of our THP/SL-S lightweight types enable motorway travel and crossing bridges which are normally only possible with detours with heavier systems.

This means that higher payloads can be transported at the same time.

06

THP/SL-L

LIGHT WORK FOR TRANSPORTATION

THP/SL-L modules unfold their full strength in road transport for particularly heavy loads. Loading goods and cargo are getting heavier, larger, and all above, higher. This requires a low dead

weight and a low construction height of, for example, loading decks with a simultaneously high bending moment.

08

THP/SL THE ORIGINAL

THP/SL – the synonyme for heavy-duty transport. Our original does not need any description because our customers around the world already trust in THP/SL modules. They are always used when heavy-duty loads have to be moved when high

bending moment is required. The THP/SL provides a solution for any transport requirements due to a wide range of possible variations, such as split modules and a huge range of

10

THP/SL-FAMILY IN USE

Loads of several thousand tons? No problem with the heavy-duty modules from the THP/SL family. The THP/SL family has proven itself to be unbeatable in use due to its almost unlimited combination possibilities and the optimum ratio of payload to axle load.

THE ORIGINAL: GOLDHOFER IS WORLD MARKET LEADER

With the cumulative experience gained from well over 16,000 axle lines in use worldwide, you can be sure that vehicles from our THP/SL family will never let you down.

MORE ABOUT
THE TYP
THP/SL **PAGE
10**

HIGH PAYLOAD

Heavy-duty modules from the THP/SL family achieve axle loads of up to 45 t. Due to the optimum ratio of payload to axle load, the high bending torque and the low dead weight of all SL modules. Difficult transport tasks are made easy.

ARBITRARILY COMBINABLE

All THP modules can be combined with Goldhofer components - such as goosenecks, turntables, flatbed or excavator decks. The combination with other heavy-duty modules such as the »ADDRIE« or vehicles of type PST/SL and PST/SL-E is also easy. This flexibility makes it possible to create exactly the combination which is most economical for the current transport task.

GOLDHOFER PENDULAR AXLE WITH BALL BEARING RACE RING

The tried and tested Goldhofer pendular axle technology for the THP/SL family is based on components from premium manufacturers and enables axle loads of up to 45 t and a hydraulic axle compensation of 600 mm. The low-maintenance and robust slewing ring bearing unit is bolted directly to the frame and is therefore particularly advantageous in use on hard terrain.

- 1 – Steering lever for the mechanical steering system
- 2 – Slewing ring bearing
- 3 – Hydraulic cylinder
- 4 – Wheel suspension
- 5 – Brake cylinder

THP/SL-S A LIGHTWEIGHT THE HEAVIEST FOR LOADS

YOUR BENEFITS

- ✓ Extremely low dead weight
- » Very high payloads
- ✓ Various tire sizes
- » Ideal adjustment for loading height or more robust site utilization
- ✓ Widest-possible track in the SL-family
- » Higher lateral stability

TECHNICAL FEATURES

- | | |
|---------------------------------------|-------------------|
| + Single tires ^[1] | 245/70 R 17.5 |
| + Axle load ^[1] | 15.6 t at 20 km/h |
| + Dead weight (4-axes) ^[1] | 9.6 t |
| + Single tires ^[2] | 285/70 R 19.5 |
| + Axle load ^[2] | 23 t at 10 km/h |
| + Dead weight (4-axes) ^[2] | 10.2 t |
| + Maximum steering angle | ± 55° |
| + Vehicle width | 3,000 mm |

APPLICATION EXAMPLE

STHP/SL-S (5+4) transporting a steel component. Accessories such as excavator bridges can be used flexibly, also to extend the loading area as in this example.

THP/SL-L LIGHT WORK FOR TRANSPORTATION

YOUR BENEFITS

- ✓ Ideal combination between dead weight and bending moment
- » Optimized for on road operation with limited axle loads
- ✓ Combinable with other heavy-duty modules from the SL-family
- » Extension and higher flexibility for the vehicle fleet
- ✓ Maximum possible closed loading area
- » Higher torsional stiffness and working safet

TECHNICAL FEATURES

- + Twin tires
 - + Axle load
 - + Dead weight (4-axles)
 - + Vehicle width
 - + Maximum steering angle
 - + Optional: Split version
- | |
|-------------------|
| 215/75 R 17.5 |
| 26.1 t at 20 km/h |
| 11.1 t |
| 3,000 mm |
| ± 55° |

HIGH TRANSPORT FLEXIBILITY

Combination example: All vehicles of the SL-family can be combined with a comprehensive modular accessory system

WORLDWIDE USE UNDER THE TOUGHEST CONDITIONS

This application in South Africa impressively demonstrates the efficiency of a THP/SL-L combination.

THP/SL THE ORIGINAL

YOUR BENEFITS

- ✓ Strong frame and coupling concepts
- » For the most extreme heavy-duty transport on the road and off road
- ✓ Efficient ad-on for self-propelled heavy-duty modules
- » Economical solution for increasing the payload and maximum utilisation

TECHNICAL FEATURES

- + Twin tires
- + Axle load
- + Dead weight (4-axles)
- + Vehicle width
- + Maximum steering angle
- + Optional: Split version
